HAWAII LONGLINE OBSERVER PROGRAM QUARTERLY STATUS REPORT July 1, 2004 – September 30, 2004

Pacific Islands Regional Office National Marine Fisheries Service January 25, 2005

The Hawaii-based pelagic longline fishery targeting tunas has been monitored under a mandatory observer program since February 1994. Beginning March 1994, branch personnel have conducted daily shoreside dock rounds in Honolulu to determine which fishing vessels are in port. These dock rounds are used to obtain an estimate of fishing effort on a real-time basis by assuming that a vessel is fishing when it is absent from the harbor. This report is used to ensure prompt dissemination of Hawaii Longline Observer Data and may be revised after final data editing has been completed. The following table summarizes percent observer coverage for vessel departures, vessels arriving with observers, and protected species interactions for vessels arriving with observers during the third quarter of 2004.

Departures			328
Departures with obs	ervers		82
Observer coverage	Brd quarter		25.0%
Vessels Arriving w	ith Observers - 3rd	d Quarter	
Departures with observers in 3rd quarter			82
Observers departing in 2nd quarter arriving 3rd quarter			11
Observers departing in 3rd quarter arriving 4th quarter			19
Total vessels arriving	g with observers - 3re	d quarter	74
Protected Spec	ies Interactions	s - 3rd Quarter	
		arter	74
Trips with turtle interactions			
Trips with marine m	ammal interactions		2
Trips without marine mammal interactions			
Trips with seabird in	teractions		O
Trips without seabird interactions			
-	Total Sea Turtles In	teractions	6
I	Released dead		
	Olive ridley		6
-	Total Marine Mammal Interactions		2
	Released dead		
	False Killer Whale		1
ı	Released injured		
	False Killer Whale		1
-	Total Seabird Intera	ctions	0
-	Total Sets		936
-	Total Hooks Retrie	ved	1,834,529
-	Turtles per 1,000 Hooks Seabirds per 1,000 Hooks		0.003
;			0.000
I	Marine Mammals p	er 1,000 Hooks	0.001
Note: The percent of	f observer coverage	is based on vessel depa	rtures.
Protected spe	cies interactions are	e based on vessel arrival	ls. For the purpose of
this report or	animal that become	es hooked or entangled	is an interaction
